

The planning of my project

## NarutoDB (first page)

**center part**

- 1. image to display Naruto. (center)
- 2. GET STARTED' button. (center)

**top left part**

- 1. 'NARUTO DB' text for clicking to add some Naruto voice. (top left)

**top right part**

- 1. 'CHANGE IMAGE' button to change the image, and add sound effect for it to make it like naruto transforming. (top right)
- 2. changing background color and sound effect when clicking the image. (top right)

## Main Page (second page)

**center part**

- 1. I want to make it like a shorts(scolling tik tok), will add image , quotes(if available), audio (if available). (center)

**center bottom part**

- 1. display all the theme access in a box and do some design for example: adding related image. (center bottom)

**top left part**

- 1. 'NARUTO WORLD' when clicking it will change to the next dsplay. (top left)

**top right part**

- 1. 'BACK' to go back to the previous page . (top right)

## In the second page when clicking Each Theme (third page)

CHARACTERS, TAILED BEAST, AKATSUKI, KARA

**Header**

- 1. **top left** : a) 'NARUTO WORLD' to go back to Main page (second page).
- 2. **top right**: a) 'BACK' button to go back to the previous page.

**Center part**

**1. GET ALL CHARACTERS :**

- a) In the 'CHARACTERS' theme add some music button beside 'BACK' button so it will not be so boring when browsing because there are 1430 characters. The rest of the themes will not be added since the characters are less than 50.
- b) when click and hold the profile, make it rotate.

**2. SEARCH CHARACTERS BY NAME:**

- a) 'TAILED BEAST' themes does not have this section as it only has 10 profiles.
- b) add background colour of black at the header. (header)
- c) put the hamburger icon (menu button) beside 'BACK' button. (header)
- d) when clicking the hamburger icon, toggle to sidebar will display alphabet accordingly, click the drop down btn to see which character is under that alphabet. (sidebar)
- e) when clicking the double left arrow icon, close the sidebar. (sidebar)
- f) make a search bar to input characters name. (search bar)
- g) when input the name, either press "Enter" or click the toolbar icon at the left of the search bar will display the characters profile. (search bar)
- h) if user input name wrongly or non existing characters, trigger alert 'No character found! Try input the exact name.' (search bar)
- i) make a cross icon at the right of the sidebar to clear the search bar. (search bar)

**1. DRAW A CARD:**

- a) make a "DRAW" button to let computer randomly pick a character and display the image, id & name.

**1. QUIZ:**

- a) add some music button to let it not boring when doing the quiz.
- b) when hover the option button make the color different.
- c) if click the wrong answer make the clicked button red, and change background color of the correct answer's button to green.
- d) if click the correct button change the background color of the button to green.
- e) after finishing each question display 'NEXT' button to go to the next question.
- f) after all the questions are completed display the score and change the "NEXT" button to 'PLAY AGAIN'.
